SKILLS

Frontend	Web Design	Personal
HTML5	Figma	Persistent
CSS3	Adobe Xd	Communication
Javascript	Adobe Illustrator	Creativeness
Bootstrap, Tailwind	Adobe Photoshop	Critical Thinking
React	Canva	Decision Making
AJAX	Google Web Designer	Team Work

PROJECTS

● **Accident Detection System**
(BE final project/Major project)

We had developed an Accident detection device which had multiple sensors to acquire data.These sensors were connected to our device using a bluetooth module. On the basis of this data, predictions were made if it's accident or not. If accident has occurs then position of user and other accident details will be sent to family as well as near police station and Hospitals

● **Library Management System**
(BE 3rd year/Minor project)

I have created an automated library system for our colleague.Where students can search, request or return books to the library using this system.Backend language was Core java ,IDE used was netbeans and database was MySql.

HOBBIES AND INTEREST

Aside from learning new things and creativity, I am also interested in playing snooker, Board games, riding bikes, and exploring new places.

I am fluent in English, Hindi, and Marathi.

CERTIFICATIONS

1. React Js Udemy course completion.
2. Full stack Web Development online course from Udemy.
